Psychodrama and Experiential Processes are specifically designed to get you out of your head and into your body, allowing you to explore the subconscious roots of the issues and early childhood decisions that hold you back in life. Whether you participate in your or other's psychodramas, or even just observe the work of others, you will gain insight, clarity and the tools to help you move through your blocks to a happier, more fulfilling life.

This popular ongoing therapy group is filled with two hours of experiential group work, psychodramas and relevant teachings on topics such as codependency, communication skills, empowerment, manifestation techniques, and emotional management. It is a very safe and supportive environment for you to find the acceptance and support you need to be able to work through trauma and life issues in a fun, interesting way.

A six-month commitment is required. Group is currently forming and is scheduled to begin October 3.
