

SOUND MEDITATION AND RELAXATION

Ongoing group second Sunday of each month

1:30-2:30 pm

Suggested donation of \$20/session

Sound therapy is a valuable tool for releasing stress and anxiety and preparing the mind for meditation. I like to call it "meditation on training wheels," as access to a quieter, more peaceful mind comes naturally when listening to the sounds of the Tibetan Bells. No previous experience is necessary.

Sound waves are measured in "hertz", just like brainwaves, and have the ability to relax the mind and the nervous system and guide the listener into more meditative brainwave states.

Enjoy the relaxing sounds of Tibetan Bells, Native Flute and more, while also experiencing deep states of relaxation and stress release. You will also learn about the basics of meditation and how to develop your own daily meditation practice and maintain this sense of calm and balance throughout the week.

Please check the online group calendar at
